About Next IT Career

Next IT Career Best Software Coaching Center in Hyderabad Corporate training is a function of human resource management that aims to provide the organization's employees with the knowledge and skills required to be successful. In turn, the growth of employees also contributes to the success of the business. In recent years, its also seen as a long-term strategic assignment rather than a cost center for the organization. The majority of companies have embraced 'continual learning' in it to promote employee growth both professionally and personally and acquire a highly skilled workforce as a result.

SAP EWM WITH S/4 HANA

SAP EWM Course Outline

SAP EMM is one of the important modules in SAP ERP software and EWM application module supports the Inventory functions occurring in day-to-day business operations.

Advantages

SAP EWM reduces the cost of Operations. It minimizes Inventory losses by removing unnecessary and obsolete material. Automatic material management and Procurement activities lead to a smoother and effective process.

Course Highlights

- This Course begins with the basics of SAP and makes you familiar with its user interface.
- This Courses is intended for Beginners, SAP End Users & Professionals.
- For Beginners and End Users they can familiarize themselves with SAP module, as it covers the very basics that teach you how to perform different tasks in SAP.
- For Professionals, they can enhance their skills as it deals in depth with the advanced concepts of EWM. It describes the techniques and procedures that are most frequently employed by users when working with S/4 Hana.
- This course is designed to get a Placement in MNC as quickly as once you complete the EWM Project Training course. For that we explain Real Time Business scenarios and Interview questions at each and every topic discussion.

Course Duration: 2 and half months – 60 HRs

SAP Version: SAP ECC 6.0 Enhancement EHP 7, S/4 HANA

Project

Get Hands on Experience of SAP EWM Consultant in Real time project, How to handle the Tickets with SLA, Enhancements, RFC's, Idocs Monitoring and Support projects.
